

Index omnium verborum quae sunt in Iosephi Ignatii Fernandez del Rincon Scholis Philosophiae

Bulmaro REYES CORIA

Este Index formará parte de una obra más amplia, que incluirá edición de texto latino y traducción, así como una Introducción por Mauricio Beuchot.

Las *Scholae philosophiae*, tesis presentada en la Real y Pontificia Universidad de México en 1774, bajo la presidencia de don José Ignacio Bartolache Díaz y Posadas, se publicó ese mismo año en la imprenta de don Felipe de Zúñiga y Ontiveros. Su autor, el bachiller en filosofía José Ignacio Fernández del Rincón, originario de San Miguel, hoy el Grande, fue discípulo de Gamarra y Dávalos, quien, después de la expulsión de los jesuitas en 1767, continuó la tarea de la modernización de los estudios, iniciada por Rafael Campoy en 1750.

El contenido de la obra es el siguiente: *De re logica; De intellectu humano, ejusque operationibus; De judiciis, et propositionibus; De ratiocinatione; De veritate; De potissimis errorum causis; De mediis veritatem inveniendi communicandique cum aliis; De re psychologica; De commercio mentem inter et corpus; De physica, et regulis philosophandi; De natura corporis; De principiis corporum; De proprietatibus corporum; De tempore, loco, et vacuo; De motu corporum; De naturae legibus newtonianis; De motu reflexo, et refracto; De virtute electrica; De fulmine prout electricitati connexo; De terraemotibus prout ab electricitate pendentibus; De fluiditate corporum prout electricitati connexa; De qualitativibus corporum sensibilibus; De qualitativibus occultis.*

De esta obra hice la traducción al español, y elaboré un *Index omnium verborum*, para lo cual utilicé como fuente principal de consulta: LEWIS & SHORT, *A Latin Dictionary*; por defecto suyo, consulté FORCELLINI *Lexicon totius latinitatis*, y, por las carencias de éste, AGUSTÍN BLÁNQUEZ FRAILE, *Diccionario latino-español*, y LUIS MACCHI, *Diccionario de la lengua latina latino-español español-latino*. Desafortunadamente el *Thesaurus linguae latinae* todavía no contiene muchos de los términos que yo busqué.

Para que los interesados puedan apreciar más fácilmente algunas diferencias léxicas que se dan entre el latín clásico y este texto neolatino novohispano, marqué como neologismos (*verba novata*) los vocablos que no se registran en los diccionarios arriba citados; no señalé, por lo tanto, como tales los términos propios del latín vulgar, como *totaliter*, que se documenta en Lactancio (s. iv), y en Casiano (s. v), o *essentialis*, en Isidoro (ss. vi y vii), aun cuando sólo se registren en uno solo de los diccionarios citados; tampoco señalé como neologismos los nombres propios como Newtonus o Malebranchius, ni sus derivados; tampoco algunos términos griegos, por haber sido introducidos en plena vida de la lengua latina, a diferencia de otros, como *psychologia*, voz que fue utilizada por primera vez en 1590 por R. Goclenius (cfr. Ferrater Mora, *Diccionario de filosofía*, s. v. *psicología*). Otros fenómenos, como la confusión de las declinaciones (*symptomatis*, por *symptomatibus*) y faltas de ortografía (*systhema*, por *systema*) especialmente en nombres de origen griego, se registrarán en el aparato de la edición del texto latino. También hay diferencias sintácticas importantes, pero un análisis de tal naturaleza escapa al objetivo de este trabajo.

Cabe aclarar que no incluí los vocablos de las inscripciones de san Clemente de Alejandría y Bacon, puestas al inicio y al final de las lecciones, respectivamente, ya que no son, válgaseme la superfluidad de la observación, latín de Fernández del Rincón.

En cuanto al aspecto formal del *Index*, debo hacer notar que las palabras en negritas fueron introducidas por mí,

para dar el enunciado o para integrar familias, cuando fue necesario. Al respecto, no me pareció forzoso dar el enunciado completo; por lo cual, lo hice en forma breve, es decir: el sustantivo, en nominativo singular; el verbo, en primera persona del presente de indicativo; el adjetivo, en nominativo singular masculino. Las pocas voces con acusativo o ablativo semejantes al nominativo que no formaron paradigma, quedaron introducidas como aparecen en el texto. Distinguí con el nombre de la categoría derivada las pocas palabras que se usan con dos categorías diferentes, como “*quam* (adv.)”, e incluí el pronombre *quam* bajo *qui* sin otra marca.

A fin de poder hacer la referencia a la obra, señalé los párrafos con números arábigos, y con romanos los subtítulos. Así, en este *Index*, los números arábigos indican los párrafos, y los romanos, los subtítulos.

Finalmente, a manera de conclusión, estas *Scholae philosophiae* parecen escritas en un latín aprendido a través de la gramática y lectura de textos poco clásicos, y no de los tradicionales César o Cicerón. La contaminación lexicológica, en este caso, se debe a la interferencia de la propia lengua (*vibratorius*), la constante lectura en otras lenguas modernas (*difformis*), o la necesidad de nuevos los términos (*psychologia*).
