

NAHUATL FOLK TALES FROM ZONGOLICA, VERACRUZ

WILLIAM MILLS

as narrated by FERMÍN TLAXCALA XICALHUA

The stories

I tape recorded these seven Nahuatl folk tales in Zongolica, Veracruz in June of 1988, and transcribed and translated them over a period of years. The narrator is Fermín Tlaxcala Xicalhua, from San Martín Atlahuilco, the cabecera of the municipio of Atlahuilco, Veracruz. He was 24 years old at the time he told the stories. His assistance was also indispensable in the final stage of the translations.

Three of the stories have water as the main theme. Both “The Woman and the Water” and “San Isidro the Farmer” are allegories about the importance of sharing water, while “The Two Children” describes the miraculous origin of a spring.

“San Martin the Horseman” describes the disgraceful treatment of a saint. “The Coyote and the Possum” is a humorous and tragic animal story. “The Golden Stone” is the story of good luck followed by bad luck in the city. Finally, “The End of the World” incorporates a wise rabbit and a variation on the biblical flood theme.

The transcriptions

These are phonetic transcriptions in a practical orthography. I have tried to record as much of the phonetic variation and details as was practical. The Nahuatl transcriptions adopt some Spanish spelling conventions. The sequences *qu*, *gu* and *hu* followed by a vowel are pronounced as [k], [g] and [w], and the letters *c* before *e* or *i* and *z* are pronounced as [s]. Apostrophes are used as in English contractions to indicate a missing sound. Stress is normally penultimate in Nahuatl. When stress is not penultimate in a multisyllabic word, the stressed vowel has an accent mark. Long vowels are indicated by a colon (:) after the vowel. Vowel length in the transcriptions reflects my own listening judgements.

Dialect features

The Nahuatl spoken in the Sierra de Zongolica has some interesting features. Examples of these are noted in the stories, especially in "The Woman and the Water".

1. Deletion of word-final /n/ is very common in Zongolica, as in many modern dialects.

2. Both /w/ and /k/ have phonetic variants which occur between vowels. Intervocalic /w/ is often an unrounded voiced bilabial stop or fricative, represented in the transcriptions by *b*. For example, *ibuan* 'and' is often written as *iban* to indicate that the /w/ is unrounded.

Similarly, intervocalic /k/ is often pronounced as a voiced velar stop or fricative, represented by *g*. An example is *xiguita* 'look!'.

3. Certain verbs take a *-qui* past tense singular suffix, parallel to the much more common *-que* past tense plural suffix. The examples below are taken from the texts:

<i>mócuepqui</i>	'it turned into something'
<i>otlanqui</i>	'it ended'
<i>onébnenqui</i>	'he walked'
<i>oquittlábtlanqui</i>	'he asked for it'
<i>oquíttequi</i>	'he cut it'
<i>ocuálanqui</i>	'he became angry'

4. As the above examples show, past tense singular *-qui* is often accompanied by antepenult stress. Antepenult stress also occurs frequently with the absolute suffixes *-tli* and *-li* (but not *-tl*) and the plural noun suffix *-ti(n)*. Rarely, antepenult stress occurs with the *-meh* noun plural suffix, the *-que* past tense plural suffix and the *-ni* and *-qui* nominalizing suffixes:

<i>tlámantli</i>	'thing'
<i>pinotláb tolli</i>	'foreign language'
<i>macébaltib</i>	'common people'
— the <i>-tin</i> plural noun suffix often becomes <i>-ti(b)</i>	
<i>cámohtin</i>	'sweet potatoes'
<i>nó:chimeh</i>	'prickly pear fruits'
<i>onébnenque</i>	'they walked'
<i>técuani</i>	'coyote'
<i>tiópixqui</i>	'saint, priest'

These stress changes are at least sometimes optional. A single talker can pronounce a word with antepenult, and at other times with penultimate stress.

5. Word-final [e] is sometimes raised to [i]. This can be confusing, especially when the vowel in the *-ke* past tense plural suffix is raised to *-ki*, which is the same as the past tense singular suffix.

6. When it occurs at the end of a syllable, /w/ is devoiced. When the devoiced /w/ retains the bilabial feature, it sounds almost like [f], and is spelled *ub*, as in *xiuhyo* ‘leaves’. The /w/ in this environment is also commonly reduced to [h].

Devoicing of /w/ also occurs in the *-huan* suffix of the three pronouns *tehhuan* ‘we’, *nomehhuan* ‘you plural’ and *yehhuan* ‘they’. The first *h* in the spelling is pronounced [h], while the following *bu* is a bilabial devoiced /w/. Note that the spelling of these three words does not indicate the devoicing.

There are a few examples of an unusual sound change involving word-final [w]. The singular past tense forms of the verbs *cahua* ‘remain’ and *chibua* ‘make, do’ would be expected to end in a bilabial devoiced *w* (*omocauh* and *oquichiuh*) or [h]. While the word-final segment of these words is often [h], it is never a bilabial devoiced *w*. Infrequently the past tense forms are *omocan* and *oquichin*, suggesting that word-final /w/ becomes [n]. The rarity of this sound change could be due to the strong tendency to delete word-final *n*. Indeed, a third form with no final consonant (*omoca* and *oquichi*) occurs more frequently than *omocan* and *oquichin*. This sound change occurs elsewhere.¹

Resumen

William Mills nos presenta siete relatos en náhuatl, grabados en Zongolica, Veracruz, en junio de 1988. El narrador fue Fermín Tlaxcala Xicalhua, quien en ese tiempo contaba con 24 años y era originario de San Martín Atlahuilco, cabecera municipal de Atlahuilco, Veracruz. Tomó varios años tanto la transcripción como la traducción de los textos, y resultó indispensable la ayuda de Fermín en las etapas finales de esta última. De acuerdo con Mills, el compilador, tres de las historias manejan la temática del agua, como “La mujer y el agua” y “San Isidro Labrador”, que son alegorías acerca de la importancia de compartir el agua, y “Los dos niños”, que relata el origen milagroso de un manantial; las demás tratan temas diversos: “San Martín Caballero” aborda la actitud vergonzosa respecto a un santo, “El coyote y el tlacuache” representa una historia animal trágica y a la vez divertida, “La piedra dorada” es un cuento de la buena suerte seguida de la mala suerte en la ciudad, y en “El fin del mundo” se incorpora un conejo sabio a una variación del relato bíblico de la inundación. En la transcripción de los textos Mills presenta observaciones relativas a la variación dialectal del náhuatl de la Sierra de Zongolica, además de la traducción al español y al inglés.
